FIKIRYILKAL TAGES
Fullstack Developer

📞 +251-933602575　✉ fikeryilkaltages@gmail.com　in linkedin.com/in/fikiryilkaltages

Summary

Fullstack Developer with a strong foundation in modern web technologies including JavaScript, TypeScript, React, Next.js, Node.js, and MongoDB. Skilled in building scalable web applications, designing clean user interfaces, developing secure authentication and role-based systems, and integrating AI features including agentic workflows.

Skills

Programming: JavaScript, TypeScript, Python
Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS
Databases: MongoDB, PostgreSQL

Experience

Fullstack Developer Intern　　　　　　　　　　　　　　　　　　**April 2025 – June 2025**
Bacos Technology　　　　　*Tools Used: TypeScript, React, Express.js, Postgress SQL*

- Built scalable web applications with React and Next.js, implementing secure **authentication and role-based access control** for users.
- Collaborated with a team of 3 developers to deliver end-to-end features, ensuring clean UI, consistent performance, and maintainable code.

Freelance Developer　　　　　　　　　　　　　　　　　　　　　**2025 – Present**
Private Clients / MyKalat Projects (Remote)　　*Tools Used: TypeScript, React, Next.js, Node.js, MongoDB*

- Built and deployed multiple fullstack web applications, including dynamic dashboards and interactive interfaces.
- Delivered client projects on time, ensuring scalable, maintainable code and cross-device compatibility.

Projects

Ethify Website Builder | *React, Next.js, Node.js, MongoDB, AI Integration*　　**March 2025 – April 2025**

- Developed Ethify, a fully functional e-commerce website builder platform with global components and page editor.
- Built core features for customer management, product management, category organization, page customization and payment/delivery setup through an intuitive dashboard.
- Demonstrated **multi-talented full-stack expertise** by handling frontend, backend, and database
- Optimized the platform for scalability, performance, and professional user experience for businesses of any size.

MyKalat Marketplace Platform | *Next.js, React, Node.js, MongoDB*　　　**April 2025 – Present**

- Developed a full-stack marketplace connecting businesses with influencers for targeted campaigns.
- Designed a scalable SaaS architecture with secure **authentication, real-time messaging and role-based access control** for multiple roles: business, influencer, and admin.
